Lab Practice Task

Online Job Application System

Question

Design and develop an Online Job Application System using HTML and PHP. The system should contain a job application form where an applicant can enter their Applicant ID, Full Name, Email, Phone Number, Password, Gender, Job Position, Educational Qualification, and Address. The applicant should also be able to upload their CV/resume in PDF or DOC/DOCX format. When the form is submitted, the PHP program must receive the information using the POST method and validate all required fields. The system should check that the Applicant ID and Name are not empty, the email address is valid, the phone number contains a valid number of digits, the password contains at least 6 characters, a gender and job position have been selected, and the address is provided. The uploaded CV must be processed using the \$_FILES superglobal, and the system should allow only PDF, DOC, and DOCX files with a maximum file size of 2 MB. If the information or uploaded file is invalid, appropriate error messages should be displayed. If all information is valid, the CV should be stored inside an uploads folder and the applicant's information should be displayed on a successful submission page. The program must demonstrate the use of PHP Superglobals, including \$_POST, \$_GET, \$_FILES, \$_REQUEST, and \$_SERVER. After successful registration, use GET parameters to send the Applicant ID, applicant name, and uploaded CV filename to the result page.

Requirements

1. Project Structure

- index.php
- process.php
- result.php
- uploads/

2. Form Fields

- Applicant ID
- Full Name
- Email
- Phone Number
- Password
- Gender: Male / Female
- Job Position: Software Developer / Web Developer / Database Administrator / Network Engineer
- Educational Qualification

- Address
- CV Upload
- Submit Button

The form must use method="POST" and enctype="multipart/form-data".

3. Form Validation

Field	Validation
Applicant ID	Cannot be empty
Name	Cannot be empty
Email	Must be a valid email
Phone	Must contain 11 digits
Password	Minimum 6 characters
Gender	Must be selected
Job Position	Must be selected
Qualification	Cannot be empty
Address	Cannot be empty
CV	Must be uploaded

4. File Upload

The applicant must upload a CV.

Allowed formats: PDF, DOC, DOCX

Maximum file size: 2 MB

Use the \$_FILES superglobal to retrieve and process the uploaded file.

Store the uploaded file inside the uploads/ folder.

5. PHP Superglobals

Superglobal	Required Use
\$ POST	Receive form information.
\$ FILES	Process the uploaded CV.
\$_SERVER	Check whether the form was submitted using POST.
\$_GET	Send Applicant ID, Applicant Name, and Uploaded CV Name to result.php.
\$_REQUEST	Retrieve at least two values from the request in result.php.

6. Expected Successful Output

```
=====
APPLICATION SUCCESSFUL
=====
```

Applicant ID: 101
Name: Rahim Ahmed
Email: rahim@gmail.com
Phone: 01712345678
Gender: Male
Job Position: Software Developer
Qualification: BSc in CSE
Address: Dhaka, Bangladesh

Uploaded CV: resume.pdf

Application submitted successfully.

7. Expected Error Output

Application Failed!

Applicant ID is required.
Name is required.
Email is required.
Phone number is required.
Password is required.
Please select your gender.
Please select a job position.
Qualification is required.
Address is required.
Please upload your CV.

Main Concepts

HTML Form → POST Submission → \$_POST → PHP Validation → \$_FILES → File Upload
→ \$_GET → Result Page → \$_REQUEST
